Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              OM protein - protein search, using sw
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Database
               Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   1306

Biochem. Biophys. Res. Commun. 151:630-631(1988).

-I- FUNCTION: Seems to inhibit trypsin, factor VIIa/tissue factor, weakly factor Xa. Has no effect on thrombin.

-I- SUBCELLUIAR LOCATION: Secreted.

-I- TISSUB SPECIFICITY: Umbilical vein endothelial cells, liver, placenta, heart, pancreas, and maternal serum at advanced

c. Natl. Acad. Sci. U.S.A. 99:16899-16903(2002).
FUNCTION: Seems to inhibit trypsin, factor VIIa/tissue factor,
weakly factor Xa. Has no effect on thrombin.
SUBCELLULAR LOCATION: Secreted.
TISSUB SPECIFICITY: Highly expressed in placenta. Also expressed
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 B Swiss-Prot entry is copyright. Res. 69:547-553(1993).
-I- FUNCTION: Inhibits factor X (X(a)) directly and, in a Xa-depende way, inhibits VIIa/Tissue factor activity, presumably by forming quaternary Xa/LACI/VIIA/Tp complex. It possesses an antithrombol action and also the ability to associate with lipoproteins in plasma.
-I- SUBCELLULAR LOCATION: Secreted.
-I- DOMAIN: This inhibitor contains three inhibitory domains. The first domain interacts with VIIa and TF, the second one with Xa
